

Skills & Tools

Languages	Python, TypeScript, JavaScript, C++, SQL
AI	Agentic AI, RAG, MCP, Generative AI, AI Automated Workflows, Langchain
Backend	Django, FastAPI, Node.js, Celery
Frontend	Next.js, React, Redux
Cloud & Infrastructure	AWS, Kubernetes, Docker, GitLab CI/CD, GitHub Actions, Terraform, Prometheus, Grafana
Data	PostgreSQL, MongoDB, Snowflake, Lakehouse, Redis, PgBouncer, CDC, Pinecone
Testing	Pytest, Cypress, Postman

Work Experience

Goldman Sachs Associate (SDE II)

Hyderabad, Telangana

Jun 2025 – Present

- Contributed to the evolution of Goldman Sachs’ enterprise AI platform into an agentic orchestration framework supporting **200+ enterprise use cases**, processing over **2M prompts/week** and over **1T tokens**.
- Implemented historical and live data ingestion workflows using the firm’s CDC platform to migrate conversational data from MongoDB into Snowflake for analytics and regulatory reporting.
- Built executive dashboards on Snowflake exposing token usage, prompt volume, model adoption, cost utilization, guardrail violations, and prompt library analytics.
- Designed and developed a Kubernetes-based MongoDB retention service, enabling configurable archival and purge policies while preserving active conversations.
- Exposed Prometheus metrics enabling tenant teams to build self-service Grafana dashboards and published firmwide documentation to drive adoption.
- Implemented health checks and synthetic monitoring, contributing to a **99.9% availability SLO**.
- Delivered firmwide AI sessions, educating **1000+ engineers** on building AI applications, Agents, MCP, and RAG.

Anchanto Senior Software Engineer

Pune, Maharashtra

Jan 2025 – May 2025

- Designed a resilient **branded notification system** using Amazon SES, Redis, Celery and FastAPI, processing **15M events/day**.
- Improved **PostgreSQL** scalability through PgBouncer connection pooling, reducing connection exhaustion by **30%**.
- Optimized CloudWatch usage by introducing log levels, saving **\$175/month** in monitoring costs.
- Implemented a **secrets caching mechanism** at application startup, minimizing AWS Secrets Manager API calls and saving approximately **\$100/month**.
- Offloaded frequent write operations to a cache-first strategy, resulting in a **25% decrease** in database queries.

Anchanto Software Engineer

Pune, Maharashtra

Jan 2022 – Dec 2024

- Developed a multi-tenant routing architecture enabling isolated enterprise customer deployments on a shared platform.
- Engineered an **RBAC system** securing permissions for **1,000+ users**, enhancing data security and compliance.
- Designed distributed event-processing services processing **500M events/month** for **30M parcels**.
- Built automated operational workflows using Celery, eliminating manual intervention across **18+** production processes.

Jano App Software Developer (Internship)

Kolkata, West Bengal

Jun 2021 – Aug 2021

- Enhanced backend services in **Node.js** and **Firebase** and integrated **Firebase Translate** for multilingual support.

Certifications

AWS Certified Developer – Associate

Amazon Web Services (AWS)

Issued: December 2024

Credential ID: 022FA19FBF484A32A078CFB564D326F2

Education

Jadavpur University (B.E. in Information Technology)

Kolkata, West Bengal

CGPA: 8.3

Jun 2018 – Jun 2022
